

NN (L) Food & Beverages

Management company: NN Investment Partners B.V.

Morningstar Ratings 30/04/2021. More info: see Lexicon.

Investment Policy

The fund invests in food & beverage companies worldwide. This includes companies carrying out their business activity in the following industries: producers and distributors of food, beverages and tobacco; manufacturers of non-durable household goods and personal products; food & pharmaceutical retailers. The portfolio is diversified across countries. The fund uses active management to target companies that score well according to our systematic investment process, with stock and sub-sector deviation limits maintained relative to the benchmark. Measured over a period of several years, we aim to beat the performance of the benchmark MSCI World Consumer Staples (NR). The benchmark is a broad representation of our investment universe. The fund may also include investments into securities that are not part of the benchmark universe. Investors should be aware that the index's investment universe is concentrated and, as a result, the Sub-Fund is concentrated. This will typically result in a comparable composition and return profile of the Sub-Fund and its benchmark. The fund's stock selection process is driven by the analysis of fundamental and behavioural data and includes the integration of ESG factors. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

* The entire investment policy was taken from the Key Investor Information Document (KIID). The capital and/or return are not guaranteed, nor are they protected.

VaR (95% annualized)			23.18%

The VaR (Value at Risk) is a statistical indicator measuring the maximum annual loss that can be incurred within a certain confidence interval.

Risk and return indicator

SRRI

Risk	Lower risk - Typically lower rewards				Higher risk - Typically higher rewards		
	1	2	3	4	5	6	7
Risk					5		

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is riskfree.

This fund is in category 5 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the markets, associated with stocks and/or financial instruments used to reach the investment objective is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and the economic and political conditions each country. The Sub-Fund's liquidity risk is set to low. Liquidity risks may arise when a specific underlying investment is difficult to sell. Moreover, currency fluctuation may impact highly the Sub-Fund's performance. Investments in a theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment.

Legal Disclaimer

This is a promotional document and as such the views contained herein are not to be taken as an offer, advice or recommendation to buy or sell any investment or interest thereto. The information in this material can neither be considered as a fiscal or legal advice. Reliance upon information in this material is at the sole risk and discretion of the reader.

The Luxembourg funds mentioned in this document are sub-funds of SICAV's, established in Luxembourg. These SICAV's are duly authorized by the Commission de Surveillance du Secteur Financier (CSSF) in Luxembourg. Both sub-fund and SICAV are registered with the CSSF. All performance values that are not given in the fund currency have been calculated by conversion. The performance is calculated on the basis of the net asset value per unit: NAV-NAV (excluding any initial charge; distributions reinvested), with income reinvested. Where a Fund invests overseas, its value may fluctuate due to currency exchange rates. The Ongoing Charges are the sum of all commissions and costs charged on an ongoing basis to the average fund assets (operating expenses). The value is expressed as a percentage of the fund's assets. Unless otherwise stated, all data is unaudited.

Investment sustains risk which may include the risk of capital loss. Please note that the performance quoted above is historical and the value of your investment may rise or fall and also that past performance is no guarantee of current or future performance. The past performance is not indicative of future results and shall in no event be deemed as such. Price of Units and any income from them may fall as well as rise and is not guaranteed. Investors may not get back the amount originally invested. Foreign exchange volatility constitutes an additional exchange rate risk. Investors should not base investment decisions on this document. Read the prospectus before investing. The value of your investments depends in part upon developments on the financial markets. In addition, each fund has its own specific risks. See the prospectus for fund-specific costs and risks. For more detailed information about the investment fund, its costs and risks, please refer to the prospectus, Key Investor Information Document (KIID) and the corresponding supplements. These documents together with the annual report and the articles of incorporation for the Luxembourg domiciled product(s) are available on www.nnip.com. And free of charge upon request by (e-)mail to: info@nnip.com or Schenkade 65, P.O. Box 90470; 2509 LL The Hague, Netherlands.

As the product may not be authorized or its offering may be restricted in your jurisdiction, it is the responsibility of every reader to satisfy himself as to the full observance of the laws and regulations of the relevant jurisdiction. The Shares of the Fund have not been registered under the United States Securities Act of 1933 or the securities laws of any states of the United States, and the Fund has not been registered under the United States Investment Company Act of 1940. Shares of the Fund are not available to be offered or sold directly or indirectly in the United States or to or for the account or benefit of any United States Person, except pursuant to an exemption form, or in a transaction not subject to, applicable United States securities laws.

Footnote

Top 10 Holdings are shown excluding Cash and Synthetic Cash. Portfolio Allocations (if available) are shown including Cash and Synthetic Cash. Cash includes Deposits, Cash Collateral, FX Spots, FX Forwards and Other Liquid Assets like payables & receivables. If an allocation includes Derivatives, Synthetic Cash includes Derivatives' Cash Offsets.

For more information about the environmental and social characteristics promoted by the fund, see our SFDR page on nnip.com.

Factsheet

NN (L) Food & Beverages

Lexicon

1 Year High (dd.mm.yyyy): Shows the highest price of the fund over the past year as well as the date.

1 Year Low (dd.mm.yyyy): Shows the lowest price of the fund over the past year as well as the date.

Alpha: Alpha is an extra rate of return - through means of active management - of a fund, over and above the return of the benchmark. In case of a positive alpha, the fund has performed better than the benchmark.

Annual management fee: The management fee is an annual cost expressed as a percentage. This fee will not be charged when you buy a fund. It will be withheld annually from the fund's return. It is payment for the fund's management.

Average Credit Rating: The average credit rating of the fund is based on the average credit rating of the fund constituents. In order to calculate the composite/average rating at the instrument level, Moody, Fitch and S&P ratings are used. The composite is calculated as an average based on the availability of the credit ratings. This composite rating is calculated for Fixed Income Instruments. The credit quality designations range from high ('AAA' to 'AA') to medium ('A' to 'BBB') to low ('BB', 'B', 'CCC', 'CC' to 'C').

Beta: The beta shows how the volatility of a fund is, compared to the wide market.

Benchmark: Predetermined, objective measure against which the returns of an investment fund are compared.

Capitalisation: Capitalisation funds automatically reinvest any returns or dividends to allow the value of the initial capital to grow. Consequently, they do not pay out any periodic dividends.

Compartment: A SICAV/BEVEK investment fund or mutual fund may consist of various sub-funds that all have their own investment policies. Each sub-fund must be considered as a separate entity. The investor is only entitled to the assets and return of the sub-fund they invested in.

Country Applicable Law: The domicile or country of business is the country where the investment fund is based. This may have important consequences in terms of taxation.

Custody Fee: Fee requested by a financial institution from its customers for holding movable assets.

Distribution: Distribution funds pay out periodic (usually annual) dividends if they achieved positive results over the past year. However, the dividend is not predetermined and is set by the fund itself. It may therefore differ significantly from one year to the next.

Duration: Measure for the interest rate sensitivity of bond prices. The longer the remaining average term of the bonds in the fund (higher duration), the more the bond prices will respond to an interest rate change. When interest rates go up, bond prices will go down and vice versa.

Equities: Equities.

Fixed Income: Fixed Income.

Fixed Service Fee: To compensate for the regular and/or ongoing costs.

Floating Rate Notes: Floating rate notes are bonds with a variable rate.

Fund: 'Fund' is a commonly used term for a collective investment undertaking. The term may refer to a sub-fund of a Belgian SICAV/BEVEK investment fund, a sub-fund of a Luxembourg SICAV/BEVEK investment fund, a mutual fund or a sub-fund of a mutual fund.

Fund type: Shows the type of fund: equity fund, bond fund, money market fund, structured fund (with some form of capital protection), multi-asset fund or mixed fund.

Fund's Total Net Assets (Mln): The assets under the management of all share-classes of a fund.

Information Ratio: Benchmark for the risk of return when assessing the performance of a fund. The higher the information ratio, the higher the achieved rate of return per unit of risk.

Minimum subscription: Shows the minimum amount or minimum number of units to be invested in the sub-fund.

Money Market: Money Market.

Morningstar rating 3-years: A (quantitative) rating calculated over a three-year period, taking into account past returns and any price fluctuations.

Morningstar rating 5-years: A (quantitative) rating calculated over a five-year period, taking into account past returns and any price fluctuations.

Morningstar rating overall: The Overall Morningstar Rating is a weighted average of the independent ratings.

Morningstar Ratings: Morningstar is an independent provider of investment research. The Morningstar rating is a quantitative evaluation of the past performance of a fund. It takes into account the risks associated with a fund and the fees that a fund charges. The rating does not take into account any qualitative elements and is calculated using a (mathematical) formula. Funds are categorised and are compared with similar funds based on their score. They are then awarded between 1 and 5 stars. In each category, the first 10% receive 5 stars, the following 22.5% receive 4 stars, the following 35% receive 3 stars, the following 22.5% receive 2 stars and the last 10% receive 1 star. The rating is calculated on a monthly basis, taking into account past performance across periods of 3, 5 and 10 years, and without taking into account future markets or performance.

Multi Asset: Multi Asset.

Net Asset Value (NAV): The net asset value (NAV) is the price of a sub-fund. The NAV is calculated by adding up the values of all products the fund has invested in and dividing this by the number of outstanding shares.

Ongoing Charges: The total annual recurring costs for an investment fund expressed as a percentage. They usually include the management fee, administrative fees, publication costs, etc.

Performance: Shows how the value of an investment fund has increased (or decreased) over the specified period. The return takes into account ongoing costs, but no entry fees, exit fees or taxes.

R-Squared: Measures the relationship between portfolio and Benchmark and provides insight into the comparability of the portfolio investment vs selected benchmark. A figure close to 1 represents a strong comparability while figures close to zero are not comparable.

Rating allocation: An individual bond's credit quality is determined by private independent rating agencies such as Standard & Poor's, Moody's and BarCap & Fitch. Their credit quality designations range from high ('AAA' to 'AA') to medium ('A' to 'BBB') to low ('BB', 'B', 'CCC', 'CC' to 'C'). Investment grade bonds (ratings 'AAA' to 'BBB') usually have a lower level of risk than bonds with ratings 'BB' to 'C' that are considered as low credit-quality bonds.

Redemption fee: This is a one-off fee that may be charged when you want to leave the investment fund.

Risk and return indicator: This is the Synthetic Risk Return Indicator (SRRI). It shows a sub-fund's statutory risk score on a scale of 1 (lower risk, typically lower return) to 7 (higher risk, typically higher return). The calculation is based on the sub-fund's volatility, so it takes into account the variation of the trading prices on the market. Volatility calculations usually cover five years.

Share Class Currency: Is the currency of the net asset value. There can be share classes in various currencies within the same sub-fund.

Share Class Total Net Assets (Mln): The total managed assets in a share class.

Sharpe Ratio: The Sharpe Ratio indicates the performance of a fund after correcting it in relation to risks. The higher the Sharpe Ratio, the better the performance of a fund corrected for risks.

Sicav: SICAV/BEVEK stands for 'Société d'Investissement à Capital Variable'/'Beleggingsvennootschap met Veranderlijk Kapitaal'. A SICAV/BEVEK investment fund is a statutory collective investment undertaking, a legal entity and usually a public limited company. The typical characteristic of a SICAV/BEVEK investment fund is that it can continuously increase its capital without any formalities by issuing new shares or reduce its capital by buying existing shares.

Standard Deviation: The standard deviation tells something about the chance for a rate to fluctuate within a given range in the coming period. In case of a significant standard deviation (= high volatility), we speak about a large range of possible outcomes.

Stock exchange tax: This is stock exchange duty on the net asset value expressed as a percentage. Your bank or brokerage firm will charge stock exchange duty or tax on stock exchange transactions when you buy or sell investment funds. You will not pay any stock exchange duty when buying newly issued shares or bonds.

Structured: Structured.

Subscription fee (max.): This is a one-off fee for buyers of an investment fund. It is usually expressed as a percentage of the capital you are investing. The provided percentage must not be exceeded in case of a maximum entry cost.

Swing factor: Swing pricing aims to reduce the dilution effect brought about when significant operations within a sub-fund compel its manager to buy or sell its underlying assets. These transactions give rise to transaction fees and taxes that have an effect on the fund's value, as well as on all its investors. Where swing pricing is applied, the sub-fund's net asset value is adjusted by a particular amount when the capital flow exceeds a certain threshold (the swing factor). This amount is designed to offset expected transaction fees resulting from the difference between incoming and outgoing capital. Swing pricing might only be used on rare occasions, if at all. For more information and the latest figures, please consult the website nnip.be and go to 'Policies & Governance' under 'About us'.

Switch fee (max.): Switching costs or conversion costs are fees associated with switching from one fund to another. These costs are payable by the investor.

Total Net Value Investments (Mln): The investments under the management of all share-classes of a fund.

Tracking Error: The standard deviation of the difference between the monthly returns of a fund and its benchmark.

VaR: Value at Risk refers to the maximum potential loss a fund may suffer in one year at a 95% confidence level.

Weighted Average Maturity: The weighted average maturity is expressed in number of years, weighted by the weight of the securities in the portfolio, while allowing to estimate the interest rate sensitivity of the money market fund. The higher the weighted average maturity, the greater the impact of a change in interest rate on the portfolio's price.

Yield to Maturity: Yield to Maturity is the return on a bond investment if it is held until the end of the term.

Yield to Worst: Yield to Worst is the measure of the lowest possible yield that can be received on a (callable) bond that fully operates within the terms of its contract without defaulting.
